

MySaskHealthRecord is a secure website that enables Saskatchewan residents, 14 years of age and older, to quickly and easily access their personal health information, **including COVID-19 test results and vaccinations**. In addition, parents and legal guardians can now request permanent access to the health information of their children under the age of 14. All personal health information in MySaskHealthRecord is stored securely and can only be accessed through a highly secure, personalized login.

Available Information

MySaskHealthRecord allows patients to track information, including:

- **Medical Record** – Clinical Visit History (displayed as inpatient, outpatient or emergency), Laboratory Test Results, Medical Imaging Reports, Prescription History, and Immunization History
- **Personal Health Summary** – Allergies, Family History, Medical Conditions/Procedures, and Emergency Contacts
- **Measurements** – Body Dimensions, Diabetic Health, Heart Health, Personal Logs, and Respiratory Health
- **Personal Scheduling Log** – Appointments, Reminders, Health care Provider Contacts

**For the latest list of the health information available in MySaskHealthRecord, please visit eHealthSask.ca or call the Service Desk at 1-844-767-8259.

Patient Results

When patient results, including sensitive result information, are available in provincial repositories, that data will be available for providers in the Electronic Health Record Viewer (eHR Viewer). When applicable, those results will also be displayed in the patient's MySaskHealthRecord with no delays. Exceptions to this include a four-day delay to all pathology results.

In order to ensure a user-friendly experience, MySaskHealthRecord features multiple tools to help patients better understand their results and other information. MySaskHealthRecord includes a disclaimer to notify the patient that their results may not be final and will require the interpretation of their health care provider. Please note, patients cannot delete or modify any of the provincially-sourced information displayed in MySaskHealthRecord.

Provider Responsibilities

MySaskHealthRecord is not intended to create any additional responsibilities to providers. Instead, it's meant to act as a tool for patients to view, monitor, and track their personal health information in a way that may benefit their health care experience. MySaskHealthRecord may also help patients better understand their health conditions and optimize their appointments with health care providers by allowing them to prepare in advance.
