Depending on the level of access granted, the user will see one of two things:

- **SCI Detailed Viewer:** will show each individual source's data on a patient; as well as, the SCI Detailed View column (light yellow); OR
- **SCI Limited Viewer:** will show the SCI View column only (light yellow).

The light yellow column is the last updated attributes collected from the source where the patient presented last. The only exception is the HSN and Date of Death information, which is pulled from the HEALTH source (PHRS) only.

The HEALTH source information is pulled from the Person Health Registry System (PHRS) and is considered the source of true for both the Saskatchewan Health Card Number and Death Indicator Flag.
