Re: COVID-19 2025 Spring Campaign: Additional Dose Eligibility and Recommendations

Dear Colleagues,

Effective **March 31 to June 14, 2025, one additional dose** of an age-appropriate COVID-19 vaccine is recommended for the following **individuals at high risk of severe COVID-19 illness and outcomes**:

- Adults 80 years of age and older.
- Adult residents of long-term care facilities, personal care homes and other congregate living settings **for seniors**.
- Individuals 6 months of age and older who are moderately to severely immunocompromised due to an underlying condition or treatment (refer to <https://www.canada.ca/en/public-health/services/publications/healthy-living/canadian-immunization-guide-part-4-active-vaccines/page-26-covid-19-vaccine.html#a6.4.considerations>).
- Previously vaccinated adults 65 to 79 years old who are at increased risk of severe Covid 19 disease may also receive an additional dose.
- Ref: <https://www.canada.ca/en/public-health/services/publications/vaccines-immunization/national-advisory-committee-immunization-summary-guidance-covid-19-vaccines-2025-summer-2026.html>

Additional notes:

- The additional dose is recommended to be given at least 2 months from an individual's last COVID-19 dose.
- June 14, 2025, is the last day that those not yet immunized with a **2024-25** COVID-19 vaccine or those who need to complete a primary series, can get immunized.
 - **NOTE:** The Saskatchewan Cancer Agency and the Saskatchewan Transplant Program approve that their adult transplant patients remain eligible to receive 2024-25 COVID-19 vaccine doses after June 14, 2025, from Public Health, until 2025-26 COVID-19 vaccines are available.
- Individuals who recently had COVID-19/are recovering from COVID-19 may be immunized when they are feeling better, no interval is required.

- Refer to the *Saskatchewan Immunization Manual* [Chapter 10](#) for age-appropriate COVID-19 vaccines and doses.

Sincerely,

Dr. Saqib Shahab
Chief Medical Health Officer
