

Immunization Information

The immunization information in the eHR Viewer is from the Saskatchewan Immunization Management System (SIMS). This information updates in the eHR Viewer whenever the SIMS system is updated. SIMS began collecting data in 1996 and therefore any immunizations before that date will not be in the SIMS system. It is possible for a patient to have incomplete immunization information. For example, immunization services on a reserve are not recorded in SIMS. In addition some people have opted out of having their information entered into the SIMS database and therefore they may have no information or partial information.

When you search for a patient record the eHR viewer uses the Shared Client Index (SCI) system. SIMS has it's own patient registry. At times this causes a mismatch between the two systems. A warning will display letting you know the quality of data is compromised.

 A demographic mismatch exists between SCI and SIMS for this patient. Some records may not be displayed.

The first page to display is the Immunization History. The information is split into three possible tabs; Immunization History, Reason Not Immunized and Immunization Associated Tests.

Search

This will allow you to search for any information listed on the screen. For example, if you want to identify if a patient has received a specific immunization or lot number you can enter that in the search field.

There are two icons that will display in this data – shown below.

In addition, you can sort by the date by clicking on the headings in each column.

Alerts	Category ▲	Prescribe Date ▼	Drug	◆	Dose	◆	Days ◆	Status ◆	Prescriber ◆
--------	------------	------------------	------	---	------	---	--------	----------	--------------

If you sort by

- **Immunization Date** – allows you to view the immunizations in reverse chronological orders and visa versa
- **Vaccine** – allows you to view the vaccinations in alphabetical order
- **Dose** – allows you to view the vaccinations from highest to the lowest dose and visa versa
- **Lot** – allows you to view the vaccinations by lot numbers from highest to lowest and visa versa
- **Route** – allows you to view the vaccinations by routes in alphabetical order
- **Site** – allows you to view the vaccinations by site groupings
- **Provider** – allows you to view the immunizations sorted by the provider in alphabetical order
- **Facility** – allows you to view the immunization information by facility in alphabetical order

For a full description of the vaccinations, you should view the immunization manual located on the Forms page.
