	External	2013-Sep-24	Benefibre Chewable Tablets	2-8 tabs per day			Hird, Bev

The eHR Viewer will initially display 4 months of information but you have the option to view up to 25 months. The information displayed in the summary is reflective of the time frame selected.

1 Prescription Summary

You are here: Rx Summary

4 Months 25 Months

The Rx Summary page has three tabs of information available: Active Prescriptions, Recently Active Prescriptions and Prescription History.

2 Active Prescriptions | Recently Active Prescriptions | Prescription History

Active Prescriptions will display any prescription the PIP system believes the patient is still actively taking. This includes prescriptions that are continuous, short term or external. Medication can have a status of; Filled, Pending, Revoked, Refused or Hold. Once a medication is no longer active it will move to the Recently Active Prescription tab.

Recently Active Prescriptions tab will display any medication it is believed the patient completed taking within the last 30 days. The medication will stay on this tab for 30 days and then move to the Prescription History Tab.

Prescription History tab will display all historical medications.

Search

The search field allows you to filter the information you see on the screen. The system will use the information you enter in this field and display only the rows that have matching information.

GOOD TO KNOW

If you want to see how many prescriptions for Lorazepam an individual has it is hard to look at an alphabetical view of the screen because it can be listed under

- **APO-LORAZEPAM**
- **DOM-LORAZEPAM**
- **NON-LORAZEPAM**

By searching for “Lorazepam” you will be provided with

- All Loraepam prescriptions
- Any prescriptions that have a recorded contraindication with that drug
- Any prescriptions that mention LORAZEPAM in the note

The system will search all the columns of information as well as the attached notes and contraindications.

In addition, you can sort by the date by clicking on the headings in each column.

Alerts	Category ▲	Prescribe Date ▼	Drug ◆	Dose ◆	Days ◆	Status ◆	Prescriber ◆
--------	------------	------------------	--------	--------	--------	----------	--------------

If you sort by

- **Category** – allows you to view the continuous medications together, short term medications together and external medication together
- **Prescribed Date** – allows you to view the medication in reverse chronological offers and visa versa
- **Drug** – allows you to view the medication in alphabetical order
- **Dose** – allows you to view the highest to the lowest days supply
- **Status** – allows you to view all the medication statuses grouped together (filled, pending, hold)
- **Prescriber** – allows you to view the medication sorted by the prescriber in alphabetical order

The icons on the medication profile are show below.

To view the detail information about a prescription click on the row – you will be taken to the Rx Details Screen.
