

## The Recent Persons List

The recent person list will display a list of the last 40 patient profiles you accessed. From this list you can view a patient's profile without performing a person search.

The screenshot shows the 'Recent Persons' interface in a web browser. The interface is divided into sections: 'Today' and 'Last 7 Days'. Each section contains a table of patient profiles with columns for Name, Age, and Gender. There are checkboxes for selecting individuals or all people in a section, and a 'Remove' button below each table. Callout boxes provide instructions: 'Selection box for all people on the list' points to the top checkbox in the 'Today' section; 'Individual selection box' points to the checkbox for 'SLRR, LABONE' in the 'Last 7 Days' section; 'Click the person's name to view the patient's profile' points to the name 'MCTESTERSON, TESTY' in the 'Today' section; and a larger box explains that selecting an individual or all people and clicking the remove button will remove those names from the list.

If a link has been updated for a patient's profile then when you try to access the patient's profile from a worklist or recent patient list an error icon will be presented – a yellow triangle with an exclamation mark.

MCTESTERSON, TESTY 1975-Jul-05 (36 years) M
NAVAJO-WHITE, ADULTMALE 1969-May-02 (42 years) M
POTASSIUMTEST, TESTING 1952-Mar-15 (59 years) M
NAVAJO-WHITE, ADULTMALE 1969-May-02 (42 years) M

This indicates that not all clinical data will be available from the saved link. To correct this delete the person from the worklist and complete a new person search for them. The new link can then be populated to the worklist. If you click on the patient's name you will not be presented with clinical data rather you will be given the following error message;

Not all clinical data may be displaying for this person. Please delete this person from any of your worklists and search for the person again.
