

Bulletin 0012 - Panorama Immunization Module – Cheat Sheet

Where do I find the Immunization Events migrated from SIMS to Panorama?

Immunization events that have been entered in SIMS are being migrated to the “**Immunization Detail**” screen of the Panorama Immunization Module. The screen shots below will identify how the data was migrated and will show the two different locations in Panorama where SIMS immunization event information was migrated:

1. Immunizations: Client Immunization Profile: Immunization Detail
2. As a “migration” note in the *Comments* field in Immunization Detail

This first screen shot below shows the SIMS Immunization Information fields (e.g. Facility; Provider; Date; Vaccine, Route, Dosage, Lot Number, Site, Pop Sub Group; and Reason Not Immunized). To the right of the screen shot is a table showing where the SIMS fields for immunization events were migrated in Panorama.

Remove this client from the overdue list.

SIMS Field*		Panorama Field
Facility	→	Comments (Migration note)
Provider	→	Comments (Migration note)
Date	→	Date Administered
Vaccine	→	Immunizing Agent
Route	→	Route
Dosage	→	Dosage & Dosage UOM
Lot Number	→	Lot Number
Site	→	Site
Pop Sub Group	→	Comments (HCW only) (Also generates a Risk Factor)
Reason Not Immunized	→	Special Consideration (For most but not all)

*All of these SIMS fields are included in the “Migration Note” in **Comments** field (except the Reason Not Immunized).

NOTES:

1. If an **AEFI** is present for an immunization event, a client warning is created in Panorama
2. If an immunization event has a **Note**, a client warning is created in Panorama and the note is found in the **Comments** on the Immunization Details screen for the event.

More information about “Notes” and “Reason Not Immunized” for SIMS immunization events can be found in other cheat sheet Bulletins.

On page two of this sheet, screen shots showing the migration fields in Panorama in another graphic are provided.

Immunization Detail

*All of these SIMS fields are included in the "Migration Note" in the **Comments** field in Panorama.
