# Panorama Immunization Module – Cheat Sheet

Where do I find the Titres information migrated from SIMS to Panorama?

Titres from the SIMS **Tests/Titres** are being migrated to the "**Immunization History Interpretation Summary**" screen of the Panorama Immunization Module. The screen shots below identify how the historical Titres were migrated to Panorama:

Test/Titre	Test Admin Date	Result Rec Date	Provider	Result
Rubella ▼	2015/01/13 ...	2015/01/13 ...	▼	Rubella IgG 31.8 IU/mL; Immune

Create Immunization History Interpretation

Note: Once submitted, only Status and Pertinent to Investigation fields will be editable with the option of adding Comments.

Disease:	Rubella
*Interpretation of Disease Immunity:	Immune ▼
*Interpretation Date:	2015 / 01 / 13 🗓 yyyy mm dd
Reference Data:	31.8 IU/mL
*Reason:	Lab Serology ▼
Vaccine:	▼
Valid Doses Received:	
Doses Needed:	
Follow-up:	▼
*Status:	⦿ Active ○ Inactive

(4000 characters)

Date	Comments	Recorded By
2015 Jan 13	SIMS Migration Note: Rubella IgG 31.8 IU/ml; Immune.	Puser, Toofifyfive

TB Skin Test in SIMS		Panorama Immunization History Interpretation
Test/Titre	→	**Disease** (e.g. Rubella, Varicella, Measles, etc.)
Test Admin Date	→	**Interpretation Date**
Result Rec Date	→	**Interpretation Date** (ONLY used if Test Admin Date missing or invalid)
Provider	→	**Comments**
Result	→	**Interpretation of Disease Immunity** (e.g. Immune, Unknown, Non-Immune, etc.)
	→	**Reference Data** (Titre if present – e.g. 31.8 IU/mL)
	→	**Comments** (will include **ALL** the free text in this SIMS field as a migration note)
Note: The "Reason" in Panorama defaults to Lab Serology for Titres migrated from SIMS.		
Note: The "Status" will default to "ACTIVE" for titres migrated from SIMS.		

A **Client Warning** will flag that there is a SIMS Titre in the Immunization History Interpretation Summary in Panorama. ⚠ Warnings

The SIMS historic **Titre** information will look like this in the Panorama *Immunization History Interpretation Summary* screen:

Immunization History Interpretation Summary

Disease: [_____ ▼] [Create Interpretation]

2 Interpretation(s) total   Click on Pertinent to Investigation ID to view Investigation Summary.

Row Action: [View/Update]

	Status ▲	Interpretation Date	Disease	▼	Interpretation of Disease Immunity	Reason ▼	Vaccine ▼	Doses Needed	Pertinent to Investigations
○	Active	2015 Jan 13	Rubella		Immune	Lab Serology	-	0	-

Depending on the ***Interpretation of Disease Immunity*** and the ***Disease*** migrated from SIMS, a **Special Consideration** may also have been generated in Panorama (see the table below) from the SIMS Titre. A client warning is not created when the titre interpretation generates a **Special Consideration** since there was a warning generated for the Immunization History Interpretation.

Interpretation of Disease Immunity	Special Consideration Type	Special Consideration Reason
Disease History	PRECAUTION	Disease History
Immune	PRECAUTION	Immune
Vaccine Not Required	PRECAUTION	Vaccine Not Indicated

There is **NOT** a special consideration generated for these *Interpretations of Disease Immunity*: DOB; Indeterminate; Non-Immune; Unknown; or See Note in Comments.

<u>Reminder</u>:
After Go-Live for Panorama, if a titre is entered in the **Immunization History Interpretation Summary** screen and a **special consideration** is required the Panorama User will need to manually enter the special consideration (exemption or precaution) in the **Special Considerations** screen in Panorama.
