

Panorama Bulletin

November 6, 2014

Information Bulletin 0006

Issue:

Deployment of the Panorama Immunization module is being deferred and SIMS will continue uninterrupted.

SIMS **will not** be decommissioned as previously planned on November 6th; it will remain operational, without disruption so that public health can continue to enter new client registrations, immunization events and produce reports, including the weekly influenza immunization report of children less than 9 years of age.

Versions Affected

Version 2.5.3

Symptoms

- N/A

Response

SIMS will continue to be operational at its full capacity. The Ministry of Health and eHealth Saskatchewan is committed to the implementation of the Panorama Immunization Module. Although delayed, work continues on the migration of data into Panorama to ensure this program will be in a position to support public health operations in Saskatchewan.
