Information Bulletin 0023

Issue: Use of the Risk Factor – “Special Population - Parents/Caregivers of Newborns” and Tdap

The Risk Factor “*Special Population - Parents/Caregivers of Newborns*” will need to be added to a client record before documenting a Tdap vaccination given at an interval of less than 5 years since a previous dose of tetanus-containing vaccine.

The routine forecaster rules will invalidate a dose of tetanus-containing vaccine that has been provided at less than 5 years since the last dose of tetanus containing vaccine unless the Risk Factor is documented. Adding the risk factor will activate the forecaster to accept this dose as valid.

Versions Affected

Version 2.5.3
