

Panorama Bulletin

Bulletin #057 – Use Agent for Special Considerations

eHealth Saskatchewan

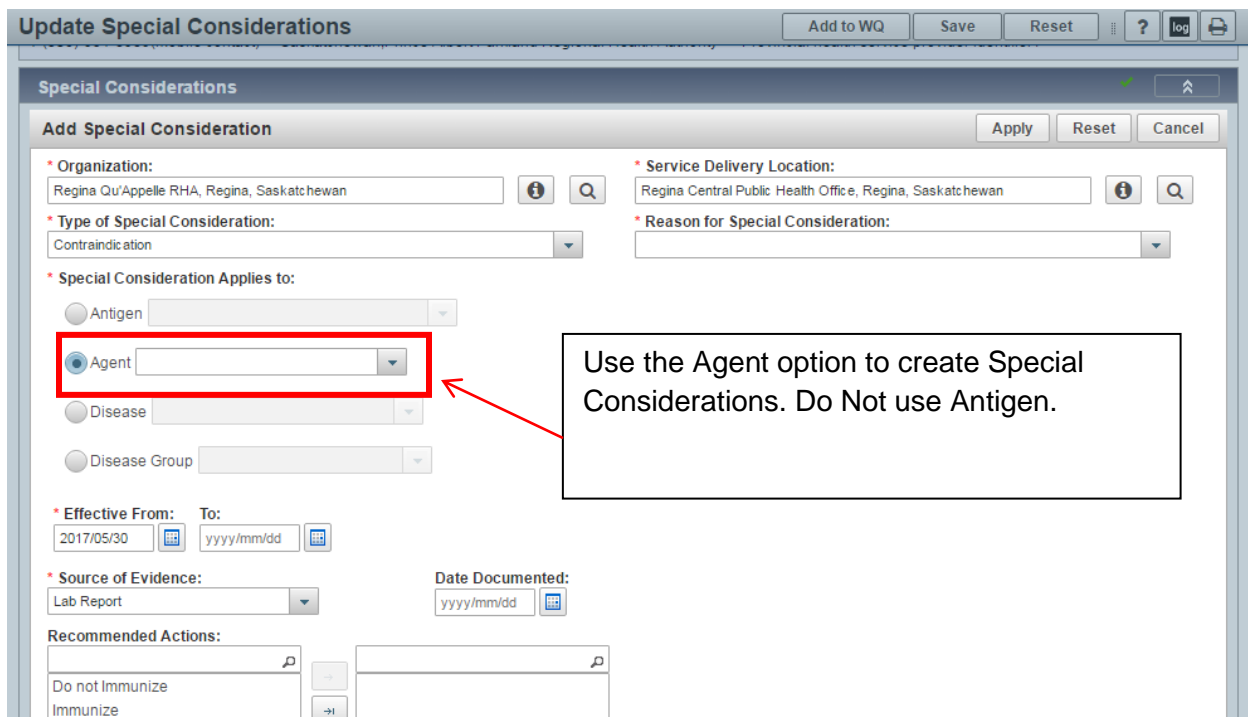

May 30, 2017

Version 1

Issue Description

Panorama 3.0 has the functionality for Users to select either an Agent or Antigen when creating Special Considerations. The old version of Panorama only offered the option to select the Agent. This new functionality does not work well with some Reporting and the Panorama Vaccine Forecaster. As a result, when creating a Special Consideration, select the AGENT and the Agent Name. DO NOT use the Antigen option. If you see a Special Consideration that used an Antigen you can update the record and select the correct Agent.

When this functionality is working consistently with all other applications then a notification will be distributed to everyone.

Update Special Considerations

Special Considerations

Add Special Consideration

* Organization: Regina Qu'Appelle RHA, Regina, Saskatchewan

* Service Delivery Location: Regina Central Public Health Office, Regina, Saskatchewan
